Dhanush Kumar D

dk652003@gmail.com | +91 94456 25370 | linkedin | Chennai | github | leetcode

Skills

Programming Languages: Java, JavaScript, TypeScript, SQL, Python, HTML, CSS

Frameworks: Spring Boot, React.js, BootStrap, FastAPI

Tools & Technologies: Spring MVC, Hibernate, RabbitMQ, ORM, REST APIs, Maven, Postman, Selenium, Git and GitHub

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, SOLID Principles, Microservices Architecture, Database Design

Experience

Application Engineer, Maatrum Technologies – Chennai Apr 2024 – Present

- Developed full-stack web applications using **Spring Boot** for building robust backend services and React with TypeScript for dynamic and responsive user interfaces.
- Created and integrated RESTful APIs**,** enabling smooth communication between frontend and backend systems.
- Designed and managed MySQL databases, writing efficient queries and ensuring proper data relationships and performance.
- Participated in the full software development lifecycle—including bug fixing, feature enhancements, and code reviews—while integrating RabbitMQ for efficient message brokering and ensuring smooth inter-service communication through regular team collaboration.

Full Stack Development Training, Bridgelabz Jan 2024 – Apr 2024

- Completed a comprehensive 3-month full-stack development training program covering both front-end and back-end technologies.
- Developed responsive user interfaces using React.js to enhance front-end performance and user experience.
- Applied Object-Oriented Programming (OOP) principles, SOLID design principles, and optimized logic using Java Collections and Streams to improve code quality and maintainability.

Education

SRM Institute of Science and Technology – Chennai, India Sep 2020 – May 2024
Bachelor of Technology (B.Tech), Computer Science and Engineering - CGPA: **9.0/10.0**

Projects

Retrospective Chat App / *Java, Spring Boot, SQL, WebSockets, React, JavaScript* Apr 2024 – Jun 2024

- Created a real-time retrospective discussion platform using Spring Boot and WebSockets to facilitate smooth collaboration across remote teams.
- Implemented **multi-room support** using **Socket.IO** and **WebSockets** for parallel project discussions, and secured chat rooms with **Spring Security** and **JWT**-based authentication with role-based access control
- Built the frontend using React and JavaScript, implementing lazy loading and asynchronous WebSocket handling to enhance UI responsiveness and optimize resource usage.

Book Store Application / *Java, Spring Boot, JavaScript, React, MySql* Jan 2024 – Apr 2024

- Developed a full-stack Book Store application with a Spring Boot backend and React frontend to provide a seamless shopping experience.
- Implemented secure user authentication and authorization using JWT, ensuring role-based access control for customers and admins.
- Enabled email notifications with a mail sender service to confirm user registrations, order placements, and password resets.

Certifications

- AWS Academy Cloud Operations
- SQL Concepts
